

Lab – Uploading a Compressed File to the Raspberry Pi

Objectives

Step 1: Upload the zip file to the Raspberry Pi

Step 2: Unzip the compressed file.

Step 3: Run the unzipped Jupyter Notebook.

Background / Scenario

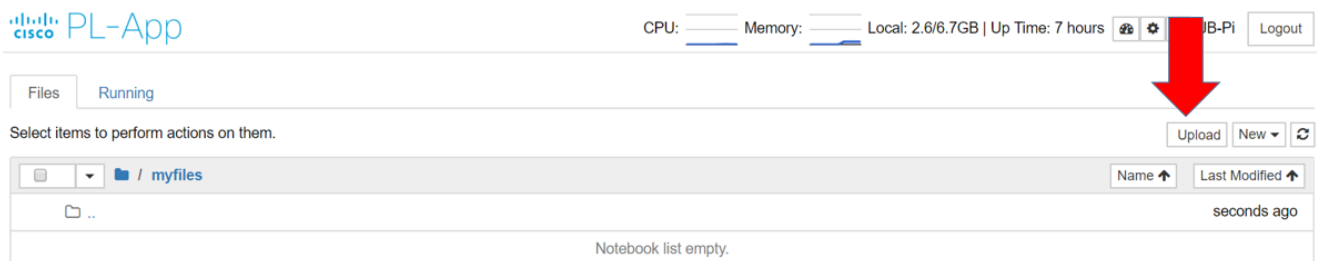

In this lab you will download a compressed Jupyter Notebook folder and upload it to your Raspberry Pi.

Required Resources

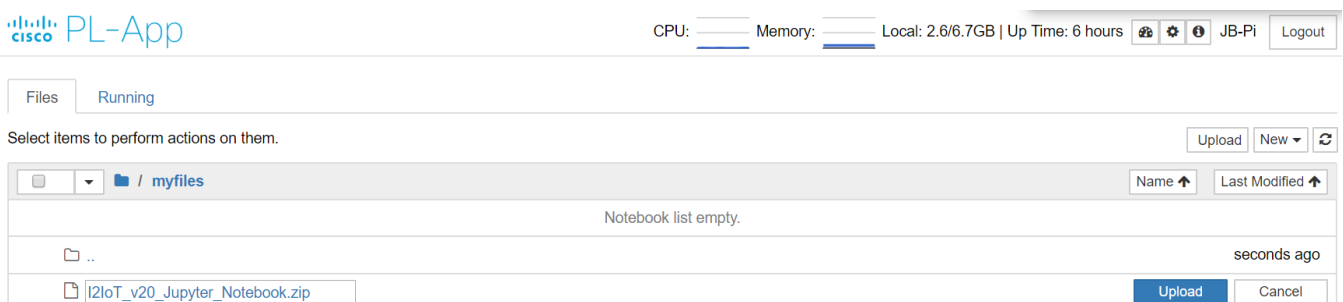

- PL-App connected to a Raspberry Pi
- Compressed notebook file

Step 1: Upload the compressed file.

- Download the compressed notebook using the link on the curriculum page.
- Open the Raspberry Pi connection and navigate to the /myfiles directory.
- Click **Upload**.

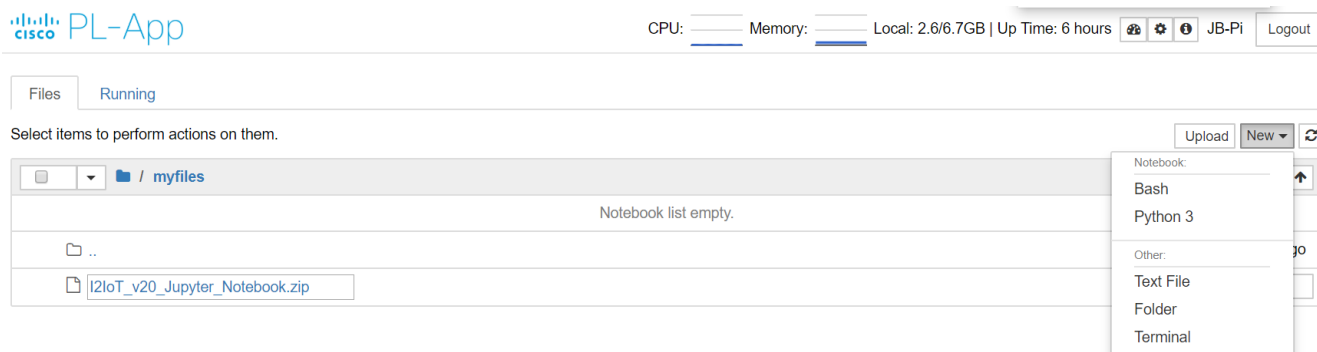

- Navigate to the downloaded compressed file.
- Select **Open** and then select **Upload** on the Pi.

Step 2: Unzip the Compressed File

- a. Select New Terminal.

- b. Enter the following commands in the terminal window:

```
cd myfiles
```

```
ls -la
```

```
unzip I2IoT_v20_Jupyter_Notebook.zip
```

```
(pl-app) root@JB-Pi:/home/pi/notebooks# cd myfiles
(pl-app) root@JB-Pi:/home/pi/notebooks/myfiles# ls -la
total 868
drwxr-xr-x 3 root root 4096 Jul 5 20:22 .
drwxr-xr-x 5 root root 4096 Jul 5 19:24 ..
-rw-r--r-- 1 root root 875428 Jul 5 20:22 I2IoT_v20_Jupyter_Notebook.zip

```

- c. Select the unzipped Jupyter Notebook folder.
- d. Start the lab by clicking on the lab notebook file.
